---

Chris and Don, this site was referred to OPA/Oil Program for further response action under OPA. Do we know what was the final site disposition decision?

Thanks.

Thanks.

Subject Wilcox Oil and Ohio Oil Refineries, Bristow

We may want to take another look at these refineries. Karen Khalafian from our office visited the area and reports that new homes have been built ON and near Wilcox, and a realty agency has For Sale signs up on the Ohio site. There is definitely development pressures on this area. These sites had PreScores in excess of 28.5 before these new residents moved on site.

Residents in the homes reported oily waste coming up in their yards, and reportedly one resident moved out after discovering a sludge pit in his back yard.
